

31 August 2021

Acquisition of Shares in Y's Global Vision, Inc.

MCP Holdings Limited acquired shares in Y's Global Vision, Inc. ("Y's Global Vision") on 27 August 2021.

Y's Global Vision develops and manufactures world's smallest and lightest class desalination machines. Y's Global Vision's desalination machines have been installed for use at more than 300 sites such as construction sites and emergency sites for 9 years since its establishment. By utilizing water data obtained from IoT sensors attached to these desalination machines, Y's Global Vision strives to be a "Smart Water Grid Company" which develops solutions for DX of water utilization. MCP Group sympathized with Y's Global Vision's mission to solve the water scarcity problem and decided our investment on its potential for growth and global expansion. We hope that the investment in Y's Global Vision will be a successful example of fund flows provided by industrial finance in Kyushu and Okinawa which accelerate start-up companies' growth. It is MCP Group's long-term commitment to support Y's Global Vision by introducing business partner, leveraging our corporate network in Kyushu and Okinawa as well as globally.
